Introduction

The financial data used to prepare this report, unless otherwise noted, was compiled from data reported to Federal Regulators. Although the information obtained from these sources is consistently reliable, the accuracy and completeness of this data cannot be guaranteed by BauerFinancial. In fact, an astute investor would agree, and experience has shown, that marginally performing institutions sometimes give themselves the benefit of the doubt when filing their reports. Our historical data helps us detect these variances.

STAR RATING SYSTEM

BauerFinancial's star ratings classify each institution based upon a complex formula factoring in current and historical data. The first step of evaluation is the capital level of the institution followed by other relevant data including, but not limited to: profitability, historical trends, loan delinquencies, repossessed assets, reserves, regulatory compliance, proposed regulations and asset quality. Negative trends are projected forward to compensate for the lag time in the data. BauerFinancial employs conservative measures when assigning these ratings and consequently our analysis may be lower than those supplied by other analysts or the institutions themselves. More than thirty years of experience has shown this to be a prudent course of action. As a general guideline, however, the following groupings were used:

5-Stars	Superior. These institutions are recommended by Bauer .
4-Stars	Excellent. These institutions are recommended by Bauer .
3½-Stars	Good.
3-Stars	Adequate.
2-Stars	Problematic.
1-Star	Troubled.
Zero-Stars	Our lowest rating.
FDIC	Institution has failed or is operating under FDIC conservatorship.

D. ASSET QUALITY, Continued. Generally speaking, the more risky loans in a bank's portfolio are construction, commercial real estate, and foreign loans. Local economic conditions cause regional variances. Individuals or businesses interested in obtaining a loan or line of credit should check that the bank is actively engaged in that type of lending. Undercapitalized banks may be required to limit their lending activity due to an effort to shrink their asset size (thus increasing their capital ratios).

Loans to executive officers, principal shareholders and their related parties (with or without collateral) are not unusual in the banking industry. However, excessive lending to insiders can cause problems if the loans are not subject to the same arm's length underwriting standards as similar loans to other customers.

	This Bank	Peer Group
Loans to Insiders/Total Loans:	0.10%	0.35%
Loans to Insiders/Total Net Worth:	0.38%	1.97%

Intangible assets are acquired by various transactions in which the purchase price exceeds the book value. For example, a bank may buy a branch of another bank for more than its book value; the premium paid would be an intangible asset to the purchaser known as "goodwill". The leverage capital ratio on page 4 excludes most intangible assets.

	This Bank	Peer Group
Intangible Assets/Net Worth:	42.38%	17.82%

Investments in unconsolidated subsidiaries and related companies can be a drain on a bank's net worth. If the book value of the subsidiary declines, so does that of the bank.

Investments in Subsidiaries/Net Worth:	0.00%	0.00%

E. LIQUIDITY. Liquidity ratios measure the relationship between current assets and current liabilities; they are indicators of an institution's ability to meet current obligations. Higher ratios reflect a reliance on funding sources that may not be available in times of financial stress or adverse changes in market conditions.

	This Bank	Peer Group
Loans to Deposits:	76.96%	76.60%
Non-core Funding Dependence:	1.14%	0.28%
Brokered Deposits/Total Deposits:	0.13%	6.56%
Deposits Acquired from use of Listing Services/Total Deposits:	0.78%	0.68%

F. GROWTH. As a general rule, growth in a bank is considered normal and desirable. If the growth accelerates to a point where it becomes unmanageable, however, it can lead to a situation of capital inadequacy and/or unprofitability. Asset shrinkage could indicate a cutback in lending.

	This Bank	Peer Group
% Change in Assets (year):	1.20%	10.81%
% Change in Equity (year):	7.01%	10.80%
% Change in Deposits (year):	10.90%	14.28%
% Change in Loans (year):	-6.56%	2.20%

G. PROFITABILITY. Standard measures of profitability are Return on Assets and Return on Equity which reflect the percentage of each that has been earned during the current period. The ratios facilitate comparisons between institutions and time periods, as the same dollar figure of net income may be good or bad, depending on the balance sheet of the institution.

Current quarter's profit:	\$71.990	million
Year-to-date profit:	\$146.962	million
Profit for Previous Calendar Year:	\$129.732	million
Profit for Calendar Year 2 Years Ago	\$168.959	million
